

## Project Timeline:

End of Semester: Have a fully functional and professional Home Page

Start of Spring Semester: Finish Website

## Project Contribution Guidelines:

Two branches: Main and Dev

- Main branch is the live website DO NOT COMMIT TO OR SUBMIT PRs for main branch
- Dev branch is for adding and testing features
- Fork Dev regularly to stay up to date

Commits:

- When committing please be descriptive but not redundant
- Commits should address one change or issue (or multiple small items)
- Try to avoid very large commits

Pull Requests:

- Again try to avoid large pull requests
- Do not merge your own pull requests either myself or another maintainer will do that
- Test code thoroughly before submitting a PR

Contributing:

- From the list of issues needing to be addressed pick one or two issues to work on at a time
- If something you think should be added is not on the list just talk to me before dedicating time to it
- Try to finish an issue to decide to work on within 1-2 weeks
